

## 4 Hour OSHA Hazardous Materials Lockout Tagout

### **Course Description:**

This four-hour / one-day course provides participants with information on the importance of energy control programs, procedures, training, audits and methods for controlling hazardous energy, and the knowledge and skills required to safely perform servicing and maintenance activities. This course specifically addresses the OSHA Control of Hazardous Energy (Lockout/Tagout) standard and is designed to inform and educate employees how to properly lockout and tagout while servicing and maintaining equipment on the job.

### **Course Objectives:**

- The employer's role and responsibility to develop and implement an energy control program, or lock-out/tagout (LOTO)
- Definitions relative to OSHA's Control of Hazardous Energy Standard
- Hazardous energy sources and energy isolation options
- Written program requirements
- Training guidelines for authorized and affected employees
- How to detect hazardous conditions and implement control measures
- The development and implementation of energy control programs, including written isolation procedures,
- Periodic inspection of energy control procedures.

### **Who should attend?**

- Construction workers
- Safety workers
- Workers of EHS facilities (Extremely Hazardous Sites)
- Hazardous waste site workers

### **Earned Credentials:**

Successful completion of the course will earn participants 4 Continuing Education Units (CEUs) and a certificate verifying this achievement.
