

16 Hour NIMS 300

Course Description:

ICS 300 outlines how the NIMS Command and Coordination component supports the management of expanding incidents as well as describes the incident management processes as prescribed by ICS. This course has a threaded activity that will give students the opportunity to practice implementing the incident management process and creating an Incident Action Plan (IAP) for a simulated expanding incident. This course provides training and resources for personnel who require advanced application of the Incident Command System (ICS). Enhance your Incident command skills and focuses on new concepts of the ICS.

Course Objectives:

- National Incident Management System (NIMS) Command and Management component at expanding incidents
- Incident/event management process for supervisors and expanding incidents as prescribed by the Incident Command System (ICS)
- Incident management process on a simulated incident
- Incident Action Plan (IAP) for a simulated incident

Who should attend?

- Fire Fighters and Hazmat Teams that respond to transportation incidents
- Spill / Safety response team members
- Supervisors of employees at EHS facilities (Extremely Hazardous Sites)
- Hazardous waste site workers
- Personnel identified in a facility Emergency Response Plan (ERP) that respond to mitigate release of Hazardous Materials or other emergencies

Earned Credentials:

Upon successful completion of the course, participants will earn 16 Continuing Education Units (CEUs) and a certificate verifying successful course completion.
